

High PSA?
Before you take this route...

TAKE THIS ONE.

Prostate Biopsy

ExoDx

We want you to know about the ExoDx™ Prostate Test, also known as EPI.

The ExoDx Prostate Test, or EPI, is a **simple, non-invasive urine test** that can help you and your doctor determine the need for a prostate biopsy. EPI provides actionable information that aids the prostate biopsy decision for men in the PSA 'gray zone' of 2-10ng/mL, and is not dependent on PSA or other clinical risk factors.

What exactly is PSA?

Prostate-specific antigen, or "PSA," is a routine blood test measured for many men in the primary care or urology setting. While PSA is not prostate cancer-specific, it is the standard of care to indicate prostate cancer diagnosis that may lead to further testing.

Making the biopsy decision is an important consideration between you and your doctor, because there are sometimes physical complications. The ExoDx Prostate Test will provide your doctor with important information to help you make this decision.

Interpreting your score is easy.

The EPI score ranges from 0-100. If your score is above 15.6, there is a higher risk for clinically significant prostate cancer that needs further treatment, such as a prostate biopsy. Talk to your doctor about this procedure.

Had a negative biopsy already?

The ExoDx Prostate Test can help you and your doctor monitor the situation before undergoing a second prostate biopsy.

We've got you covered.

The ExoDx Prostate Test is covered by Medicare as well as the VA Healthcare system, Medicaid, and several private insurance plans. We can help you navigate the complex health insurance system to determine if your plan covers the cost of the test.

Now available as an At-Home Collection Kit!

Take advantage of the test right in the convenience and comfort of your own home.

We're here to help.

Talk to your doctor about whether the ExoDx Prostate Test is right for you, or contact our customer service representatives at **844-396-7663** for more information.
