

# Ask Your Doctor

## Is the ExoDx™ Prostate Test right for me?

Talking about prostate cancer isn't easy, but your doctor can help explain how the disease is detected, how you can get tested, and what your options are if you're at risk.

### Below are some questions you can discuss with your doctor:

1. How do I find out if I have prostate cancer?
2. What is my PSA level and history of PSA levels?
3. How accurate is the PSA in assessing my risk for high-grade prostate cancer?
4. What is the chance of having a negative or undetermined result for prostate cancer if I have a prostate biopsy?
5. What is the chance of having a positive result for prostate cancer if I have a prostate biopsy?
6. What is the treatment plan if my prostate biopsy results in a "Low Grade" prostate cancer (Grade Group 1 or below)?
7. What are alternatives to a prostate biopsy for diagnosis of prostate cancer?
8. Is there any risk to obtaining The ExoDx Prostate Test before the biopsy?
9. Am I a candidate for the ExoDx Prostate Test?
10. Will I be able to use the At-Home Collection Kit?
